

Student Makers Conference 2016

On Thursday the 24th of November, 10 students were selected to attend the Student Makers

Conference at Dallas Brooks Community Primary School. This was a great opportunity for our students and selected teachers to use a variety of new technology in a STEM classroom environment. Students were involved in a range of activities such as robotics, coding on SCRATCH, movie animation, Lego, drones, circuits and other interesting gadgets! The students had a wonderful time and were engaged as they rotated through the activities.

Next year we have lots of fantastic learning opportunities as we move towards 21st Century Learning and prepare students for the future in Science & Technology. Students will continue to engage in Science and technology activities through our Integrated units and continue to integrate the use of technology during literacy and numeracy.

Mr Gualano has purchased some exciting new technology & software that the grades are currently trialling for 2017. Students will have more involvement in programming, coding, robotics, science, & engineering as well as being exposed to current trends in technology that will help them prosper and be future ready.

Very exciting times ahead so stay tuned!!
